Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 July 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of claims 1-4 in the reply filed on 7/29/08 is acknowledged. The traversal is on the ground(s) that step (c) cannot be done by hand, but the applicant admits "it may be theoretically possible to perform steps (a) and (b) by hand (see page 2 of Applicant Arguments/Remarks)." This is not found persuasive because steps (a) and (b) can be done by hand, and therefore the restriction is still proper.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "visible manner" in claim 1 is a relative term which renders the claim indefinite. The term "visible manner" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Joseph et al (6,176,428) in view of Wells et al (6,510,992).

Re Claim 1: Joseph discloses a sheet medium for providing a surface on which information can be formed in a visible manner (see Figures 1 and 1a); and an information storage and transfer circuit carried by said sheet medium for storing an electronic copy of said information in a read-only manner so that said information can be extracted for courier routing and payment purposes (see Figures 1 and 2, col.2, line 17, col.3, line 64). Joseph fails to disclose billing information. But, Wells discloses billing information (see Figures 1, 5, and 6). From the teaching of Wells, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify Joseph's invention with Wells' disclosure of billing information in order to obtain "... address information and postage value indicia on a face of each of a plurality of mail pieces (see Wells Abstract)."

Re Claim 2: Joseph discloses wherein said information storage and transfer circuit includes an RFID integrated circuit and an antenna (see Figures 1 and 2, col.2, line 17, col.3, line 64).

Re Claim 3: Joseph discloses wherein said electronic copy of said billing information includes address data; and wherein said information storage and transfer circuit includes means for limiting access of said billing information to said address data for courier routing purposes (see col.1, lines 46-49).

Re Claim 4: Josephs fails to disclose the following limitation. Wells discloses wherein said intelligent billing statement includes a separable return portion; and wherein said information storage and transfer circuit is physically located within said return portion (see col.2, lines 61-63). From the teaching of Wells, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify Joseph's invention with Wells' disclosure of a return portion in order to obtain "... address information and postage value indicia on a face of each of a plurality of mail pieces (see Wells Abstract)."
